

GPS TRACKING FOR YOUR TEEN DRIVER

What GPS Tracking Product Do You Get For Your Teen Driver?

So, it is assumed that if you are reading this guide, you have a teen driver and you're looking to use a GPS tracking system in the vehicle they drive.

Our first recommendation is to purchase a hardwired GPS tracking system. These systems are semi-permanently installed in the vehicle, and can generally be removed if you need to.

1. The hardwired system when installed is hidden, usually under the dash.
2. You can't tamper with the devices.
3. They require no physical maintenance (as opposed to a battery powered system), that needs to be periodically charged.

Our hardware prices on these GPS tracking systems range anywhere from \$289.00 through \$399.00.

Live Trac G-5

So Why The Differences In Price?

Different hardware (the actual GPS system, known as a black box), have different features and are manufactured with different components. For example, newer units have chipsets that use integrated antennas and are extremely compact, another unit type is one that can perform functions such as a starter disable and door unlock.

Installation Is Required -

A hardwired system should be professionally installed, by a person familiar with vehicle wiring - all vehicles are different. Unless of course, you already know how to do it.

Our competitors may tell you to take it to any "stereo or alarm shop". We say, do you really trust your car with "any" alarm installer or stereo shop? Not that all shops are bad, we just like to make sure, whoever is touching your vehicle is qualified in the installation of our products, and uses proper industry methods to perform the installation. For that reason, you can call us and we will find an installer in your area through our network of installers, or at the least - qualify the installer you plan to use.

How The GPS Tracking Systems Work, The Simple Version -

Our GPS car tracking systems works in conjunction with the black box, a wireless network, satellite maps, and a backend web server. The black box receives position information, and transmits it out, via a digital cellular network over the internet. A web server collects the information, and with an integrated mapping system (like Microsoft Virtual Earth/Google Maps), allows you to login to a password protect account that lets you view your vehicle's position and related data.

The Systems We Offer And Recommend For Teen Drivers:
We have two different types platforms that we use, our most popular is the Live Trac system, and our second backend platform is our VLS real-time system.

Live Trac System: Our Most Popular System.

5 or 10 Second Position Updates. Unlimited Use, about \$1 per day for service.

- View your car from any web enabled computer - or mobile phone with our custom built Iphone App/Droid App.
- Ultra fast position updates - watch live as your vehicle moves.
- See when it stops/starts and how long it was at a certain location.
- Get notified via email/cellphone when your vehicle's ignition is turned on/off.
- Get alerted via email/cellphone when your teen driver speeds.
- Verify - with a historical playback that lets you see with great detail where your car has been.
- Microsoft Virtual Earth.
- Super easy to use - simple yet extremely powerful.

The Live Trac system is our #1 recommended system. It's extremely reliable and very easy to use.

— Live Trac RTV-5

VLS Real-Time System:

1, 2 or 5 Minute Updating. From \$19.95 per month per device.

- Real-time GPS vehicle tracking
- Complete vehicle history available
- Alerts to your email/cellphone - speed alerts, zone alerts.
- Google Maps
- Locate on demand - up to 100 times per month.
- Know where your vehicle stop/started.

Why We Charge A Monthly Fee, What Your Payment Covers -

Servers, wireless data transfer costs, technical support, licensed maps, etc. are costs that we are responsible for in order to run a successful business that won't go under. We try extremely hard to keep our costs down, so you our customer is presented with a competitive cost effective solution.

Beware of Companies Touting No Fees -

We see companies advertising online, real-time tracking with no monthly fees. On most occasions, these systems either will not be real-time/live tracking systems, or have the wireless service, built-in to the hardware cost.

GPS Tracking You Can Trust:

We don't only sell these [GPS tracking](#) systems, but we trust and use them ourselves everyday with our personal vehicles.
