

Mobilelock

GPS Tracker with Ant-Theft Alarm

The **Mobilelock** is a combination GPS tracker and anti-theft alarm that can be used in a variety of ways to protect and alert your property and valuables.

MOBILELOCK

Mobilelock Hardware:

Mobilelock is a completely self-contained battery powered wireless GPS Tracker with built-in security system ideal for monitoring remote assets. 7 built-in sensors can be selected and customized through a secure website and alarm notifications can be sent out to an unlimited number of people by email, text or phone call. Cellular assisted GPS technology provides location of assets indoors or out.

The DS600 is a versatile GPS alarm system that you can use to protect and even recover your own personal property. Toy trailers, boats, jet-skis, motorcycles, just about any piece of property can be protected with a DeWalt DS600 Mobilelock. The system will not only alert you when your property is tampered with or stolen, but now you can locate it and increase your chances of recovering it.

Mobilelock Tracking Portal:

Mobilelock devices are run through a secure website. You can access the site through any computer or smart phone and you can set up an unlimited number of users for your account. Each user has their own login and password and can be assigned different levels of authority
